<b>A04D01 52.204-9C06 DSCC Part 52 - SOLICITATION PROVISIONS AND CONTRACT CLAUSES STATEMENT (JUL 2004)</b>  Full text of all DLAD/DSCC clauses listed within this individual solicitation are contained in the DSCC Part 52 - Solicitation Provisions and Contract Clauses, current version found at <a href="http://dibbs.dscclia.mil/refs/provclauses">http://dibbs.dscclia.mil/refs/provclauses</a> . Also, the full text of FAR/DFARS clauses incorporated by reference may be accessed electronically at <a href="http://www.dia.mil/j-3/j-336/icps.htm">http://www.dia.mil/j-3/j-336/icps.htm</a> . The clauses/provisions incorporated by reference have the same force and effect as if they were in full text; however, those having no bearing on the instant acquisition become self-deleting. In the event of an inconsistency between text found in DSCC Part 52 and the individual solicitation/award, the provision of the individual solicitation/award shall govern.		number; and on shipping containers and palletized unit loads for the NSN, Contractor and Government Entity (CAGE) Code, contract number and, when applicable, the serial number. The new requirements do not apply to delivery orders when the basic contract has not been modified to require MIL-STD-129P.  (b) The new MSL replaces former DD Form 1387 and is illustrated in Figures 2a and 2b of MIL-STD-129P. The MSL requires Code 3 of 9 or Code 39 linear bar codes for the Transportation Control Number (TCN), piece number and DoDAAC for the ultimate consignee or mark-for address. The 2-D bar code on the MSL must contain the document (requisition) number, NSN, Routing Identifier Code (RIC), Unit of Issue, Quantity, Condition Code, and Unit Price, which are ordinarily included on the DD Form 250 or the DD Form 1348-1A. MIL-STD-129P provides numerous illustrations of what must be bar-coded and the recommended placement of the bar code. When the contract omits any data element required to be bar-coded, the field should be zero-filled.  (c) MIL-STD-129P, sources for conforming labels, and related information are available on the DIA Packaging Web Site at URL: <a href="http://www.dscclia.mil/offices/packaging/specstdslist.html#STDS">http://www.dscclia.mil/offices/packaging/specstdslist.html#STDS</a> .  (d) This clause does not apply to - (1) Subsistence items procured through full-line food distributors (prime vendors), 'market ready' type items such as fresh milk, ice cream, and other fresh dairy products, fresh bread and other fresh bakery products, and all fresh fruits and vegetables, shipped within the Continental United States (CONUS) to customers within CONUS; (2) Any item for which ownership remains with the vendor until the item is placed in designated locations at the customer location prior to issuance to the customer. Government control begins upon placement of the item by the vendor into the designated location or issuance from the designated location by vendor personnel (i.e., the vendor is required to stock bins at the customer location and/or issue parts from a vendor controlled parts room); or (3) Bulk purchases of petroleum, oil and lubricant products delivered by (1) pipeline; or (2) tank car, tanker and tank trailer for which the container has (i) a capacity greater than 450 L (119 gallons) as a receptacle for a liquid; (ii) a maximum net mass greater than 400 kg (882 pounds) and a capacity greater than 450 L (119 gallons) as a receptacle for a solid; or (iii) a water capacity greater than 454 kg (1000 pounds) as a receptacle for a gas.  NOTES: In bar code element 1 above, the Document Number consists of a 14-character (15 characters when a suffix is included) alphanumeric code. It may be listed on a contract/award as the Requisition Number, Transportation Control Number (TCN), etc.  In bar code element 2 above, the NSN will appear as a 13-digit code without the dashes.  In bar code element 3 above:  The RIC for each procuring activity is as follows:  S9C - Defense Supply Center Columbus - Construction S9E - Defense Supply Center Columbus - Electronics S9F - Defense Energy Support Center S9G - Defense Supply Center Richmond S9I - Defense Supply Center Philadelphia - General and Industrial S9T - Defense Supply Center Philadelphia - Clothing and Textiles S9M - Defense Supply Center Philadelphia - Medical Materiel S9P - Defense Supply Center Philadelphia - Perishable Subsistence S9S - Defense Supply Center Philadelphia - Semi-perishable Subsistence  The appropriate unit of issue (U/I) will appear as a two digit alpha character.  The quantity will appear as a five-position number, including zero fillers on the left.  The above will be followed by an 'A' and eight zeros, (i.e. 'A00000000').

F11A06 52.211-16 VARIATION IN QUANTITY (APR 1984) FAR

(b) The permissible variation shall be limited to:

0 % (Percent) Increase 0 % (Percent) Decrease

This increase or decrease shall apply to the quantity at the line item level, or for phased delivery at the sub-clin level, as designated by item number followed by two alphas, i.e. 0001AA. The variation (if any) shall be shipped with the quantity for the line item, or for phased delivery the quantity specified for each sub-clin. Under no circumstances will the contractor ship a variation in quantity against any line item/sub-clin other than as specified in the delivery schedule.

## SECTION H

H15D02 52.215-9C20 ORDER TRANSMISSION (OCT 2002) DSCC

Offerors must check one of the following alternatives for paperless order transmission:  
( ) (Vendor Fill-in) Electronic Data Interchange (EDI) transmissions in accordance with ANSI X12 Standards through a registered Value Added Network (VAN).

( ) (Vendor Fill-in) Electronic Mail (email) award notifications containing Web links to electronic copies of the DD Form 1155, Order for Supplies or Services (orders are stored in Portable Document Format (PDF) and accessing them requires a free Adobe Acrobat Reader plug-in).

H17D03 52.217-9C23 SURGE AND SUSTAINMENT (S&S) REQUIREMENTS (MAR 2004) DSCC

Surge and sustainment (S&S) capability is defined as the ability of the contractor to meet increased quantity/accelerated delivery requirements, using supplier base capabilities, in support of a broad spectrum of possible contingencies. The S&S capability refers to an overall capability. This ability includes both a capability to ramp-up quickly to meet early requirements (i.e., surge), as well as to sustain an increased pace throughout the contingency(s) (i.e., sustainment). The spectrum of possible contingencies includes major theatre warfare and smaller-scale contingency operations. The increased quantity/accelerated delivery requirements are those above and beyond normal peacetime requirements. CLIN 6000 identifies the S&S requirements. The requirements should be priced based on delivering the stated quantity within the stated delivery timeframes. The Government may issue an order or series of orders equaling the surge quantities. Orders for the S&S requirements will be placed by issuance of written or electronic orders. S&S orders will not count towards the contract maximum.

As part of S&S, the contractor is required to conduct a capability assessment which demonstrates the contractor's strategy and plans to meet the S&S requirement.

(X) See provision L17D04, DSCC 52.217-9C26. The contractor's submission to this provision constitutes the capability assessment.

( ) At the contracting officer's direction, the contractor will be required to submit the capability assessment after award.

If the contractor identifies that S&S investments are needed in order to provide the S&S requirement, then the contractor must identify the costs in CLIN 6002. The contractor must provide the reasons the investments are needed for these items, a detailed explanation of what will be purchased, the S&S capability to be gained, the basis for the estimated costs of these investments, an analysis of what surge strategies were examined and why the proposed strategy is the most cost-effective. See I17C03, DLAD 52.217-9006, for additional information on allowable surge investment costs.

If the S&S proposal shows S&S investments are needed, (as documented and priced in CLIN 6002), the contractor shall have full capability of providing the S&S requirements identified in Section B of the solicitation, within the standard contract production lead-time unless a shorter time period is agreed to by the contractor and the Government after receipt of investment funds/material from the Government.

If the S&S proposal shows no S&S investments are needed, the contractor shall have full capability to provide the S&S requirements identified in Section B of this solicitation within the standard contract production lead-time unless a shorter time period is agreed to by the contractor and the Government.

After award, the contractor may be required to submit a test plan for the S&S requirements. After approval by the Contracting Officer of the S&S test plan, the contractor may be required to conduct S&S tests, or allow the government to perform S&S tests to validate the S&S capability. These tests may be in the form of paper exercises, simulations, command post exercises, or participation in live exercises (to include the Joint Chiefs of Staff (JCS) and Commander in Chiefs (CINC) exercises), or any other methodology that can validate the S&S capability.

The contractor shall maintain the S&S capability throughout the life of the contract. Any significant changes in the contractor's supplier base capabilities that would impact the contractor's S&S capability, shall be reported in writing to the Contracting Officer immediately after the contractor becomes aware of the change.

The Government may refine, reassess, or update its S&S requirements during the life of the contract, or the contractor's supplier base capabilities may change during the contract period. Either of these conditions may necessitate the contractor's reassessment of its supplier base capabilities and development of new/changed S&S strategies. Changes in S&S requirements will be made through bilateral contract modifications. Changes in contractor S&S capabilities will be made through contractor submission of a revised S&S capability assessment and revised test plan (if applicable) that addresses the changes.

The contracting officer shall evaluate both the revised S&S capability assessment and the revised S&S test plan (if applicable) for acceptability. The government reserves the right to require additional assessments/plans if the initial or any subsequent submissions are not approved.

If S&S investments are needed as a result of changed circumstances, the revised S&S capability assessment must provide the reason(s) investments are needed for these items, a detailed explanation of what will be purchased, the S&S capability to be gained, the basis for the estimated costs of these investments, an analysis of what surge strategies were examined and why the proposed strategy(ies) is(are) the most cost-effective.

The above language does not limit the government's right, at any time after award, to perform inspections or test the contractor's S&S capability. In the event a contingency occurs before the contractor develops full S&S capability to address changed circumstances, or the contingency requirements exceed those defined in Section B, the contractor shall support S&S requirements to the maximum extent possible.

If the contractor fails to perform in accordance with the requirements set forth, a contingency(s) arises before the contractor has established full S&S capability to address changed circumstances, or other circumstances create a need, the government has the right to take any action necessary to obtain S&S requirements from other sources (including sources in the contractor's supplier base). This language does not relieve the contractor from responsibility for providing peacetime level quantities during the contingency (i.e.: non-surge requirements).

(c) The Offeror shall list which hazardous material listed in the Hazardous Material Identification and Material Safety Data clause of this contract will be labelled in accordance with one of the Acts in paragraphs (b) (1) through (5) of this clause instead of the Hazard Communication Standard. I16A17 52.216-19 ORDER LIMITATIONS (OCT 1995) FAR

(a) Minimum Order. When the Government requires supplies or services covered by this contract in an amount of less than N/A DVD or 10 EACH Stock, the Government is not obligated to purchase, nor is the Contractor obligated to furnish, those supplies or services under the contract.

(b) Maximum Order. The Contractor is not obligated to honor -

(1) Any order for a single item in excess of N/A DVD or 150 EACH Stock

(2) Any order for a combination of items in excess of N/A or

(3) A series of orders from the same ordering office within 15 days that together call for quantities exceeding the limitation in subparagraph (1) or (2) above.

(d) Notwithstanding paragraphs (b) and (c) above, the contractor shall honor any order exceeding the maximum order limitations in paragraph (b), unless that order (or orders) is returned to the ordering office within 30 days after issuance, with written notice stating the contractor's intent not to ship the item (or items) called for and the reasons.

I16A24 52.216-22 INDEFINITE QUANTITY (OCT 1995) FAR

(d) Any order issued during the effective period of this contract and not completed within that period shall be completed by the Contractor within the time specified in the order. The contract shall govern the Contractor's and Government's rights and obligations with respect to that order to the same extent as if the order were completed during the contract's effective period; provided, that the Contractor shall not be required to make any deliveries under this contract after one year from the expiration date of this contract or final scheduled delivery date under any delivery order placed hereunder, whichever is later.

I16D02 52.216-9C02 PRICING OF DELIVERY ORDERS (JUN 2003) DSCC

(a) In pricing delivery orders requiring delivery of one NSN to multiple destinations, the price for each destination will be based on:

[X] (1) The quantity range price based on the total quantity of the NSN being procured under each delivery order regardless of destination.  
[ ] (2) The quantity being shipped to each destination.

(b) If this solicitation/contract contains provision for placement of orders through POPS (Paperless Ordering Placement System), unit prices for those orders will be based on:

[X] (1) The total quantity of all requirements for each NSN issued via POPS in a single day, regardless of the number of individual orders.  
[ ] (2) The quantity of each individual order.

(c) If this solicitation provides for partial set-aside and the set-aside portion is awarded to the same contractor receiving the award on the non-set-aside portion, the pricing of delivery orders will be accordance with paragraph (a) above.

(d) The minimum quantity to be ordered, per destination, will be the minimum ordering range quantity if specified in section B hereof, for each item.

I16D03 52.216-9C03 CONTRACT PERIOD (MAR 1981) DSCC

(a) The contract period will be for one year beginning [X] on date of award;

[ ] on a date to be specified not later than days after date of award.

The effective date of the contract will be stated in the award.

I16D06 52.216-9C06 CONTRACT LIMITATIONS (MAR 1998) DSCC

[X] (a) For the purposes of determining the obligations of the parties hereto with respect to the quantities to be

furnished/ordered during the contract period, the following minimum and maximum quantities or dollar figures are established:

(1) Minimum Quantity or Dollar Figure: \$6,727.20  
(2) Maximum Quantity or Dollar Figure: \$499,999.99

The Government is obligated to order only the minimum quantity or dollar figure stated above.

[ ] (b) Partial SET-ASIDES - If this solicitation provides for a partial Small Business set-aside and the resulting award is made to a contractor receiving the set-aside and non set-aside portion, the quantities specified in paragraph (a) will be doubled.

[ ] (c) Multiple NSNs - The CONTRACT MINIMUM will be , which is the total of the individual quantities or

dollar estimates for all NSNs listed below. The totals listed below are estimates only and will be used to determine the minimum quantity or dollar value of the contract in the event of split awards. If there are split awards, the contract minimum will become the total of the estimates below for the NSNs awarded. The resulting contract minimum applies to the entire range of items awarded and does not guarantee that the Government will purchase any particular quantity or dollar amount of any NSN awarded. The CONTRACT MAXIMUM will be

## CHECK APPLICABLE BLOCK:

(X) Contract period as defined in this clause means the extended contract shall be inclusive of the option period.  
( ) Contract period as defined in this clause means a separate contract period for the initial basic and each option year.

I16D20 52.216-9C20 ESTIMATED TOTAL QUANTITY (AUG 2001) DSCC

a. The estimated total quantity the Government expects to order during each contract year is as follows:

CLIN(s)	Quantity
0001	80

b. In the event this solicitation provides for a partial set-aside the estimated total quantity for the set-aside portion is as provided in the clause entitled 'Set-Aside Portion' set forth in Section I of the solicitation.

NOTE: It is anticipated that the quantities listed will remain constant for the additional option term indicated in Clause I17D01 (DSCC 52.217-9C13), I17D04 (DSCC 52.217-9C12), or I17D03 (DSCC 52.217-9C05).

I16D52 52.216-9C52 METHODS OF PRICING ORDERS (ITEM M/YEARS) (NOV 1992)

Unless a different method is specified elsewhere, the price for any order issued hereunder shall be determined as follows:

a. The year that the order is issued, and  
b. The unit price applicable to the quantity ordered shall be the unit price for the incremental quantity range in which the quantity ordered falls.

I17C03 52.217-9006 LIMITATIONS ON SURGE AND SUSTAINMENT (S&amp;S) INVESTMENTS (JUL 1999) DLAD

The contractor shall limit investments in surge and sustainment (S&S) materials or other S&S capabilities paid for through DLA's industrial preparedness funds in the following ways:

(a) These investments can only be made to meet S&S requirements in support of major theatre warfare or smaller scale contingencies. They cannot be made to meet spikes in

19

peacetime demand, nor to meet peacetime level quantities supplied during a contingency.

(b) Investments shall not be made when substitute items or alternate manufacturing processes are available.

(c) Investments must be the most cost-effective means of ensuring S&S capability.

(d) Investments shall be made only for raw materials and partially finished parts needed to provide long lead-time items in shorter time frames. Investments in finished parts or in support of items with short lead-times cannot be made.

(e) Only when the level of DLA and MILSVC (when MILSVC customer base is limited) assets related to the specific customer base served under the contract, and commercial inventories and production capacities in the contractor's supplier base are insufficient to meet both peacetime and S&S requirements, should S&S investments in materials be made.

(f) Investments shall not be made for MILSVC managed items.

(g) S&S investments made shall not be used as a safety stock (i.e., to meet peacetime spikes in demand).

(h) The contractor shall not access S&S investments for any purpose other than to support the contingencies indicated in paragraph a, unless such access has been authorized by the Contracting Officer in writing. Offerors/contractors shall describe any desired access to the S&S investments and consideration offered to the government for this access in their S&S proposals/S&S capability reports. However, written approval from the contracting officer must be provided prior to implementing any proposed access.

I17D04 52.217-9C12 EXTENSION OF CONTRACT TERM (OCT 2003) DSCC

b. If the Government exercises this option for extension of the contract term, the contract as extended shall be deemed to include this option clause. However, the total duration of this contract, including the exercise of any options under this clause, shall not exceed 3 years.

d. This clause will be used in evaluation of offer.

A 3 year contract (base year plus option year(s) is desired.

OFFEROR MUST CHECK THE FOLLOWING BLOCKS FOR OPTION YEARS:

( ) (Vendor Fill-in) The Government's desired option is acceptable.

( ) (Vendor Fill-in) No option is acceptable.

( ) (Vendor Fill-in) option years are acceptable.

NOTE 1: When sending a facsimile proposal, the contractor should program the machine to include his telephone number as the distant station ID. This information is required to assist in documenting receipt of the order.

NOTE 2: Reject offers received via the DSCC Internet Bid Board

System (DIBBS). This mode of transmission is not authorized for large purchase acquisition. If the DIBBS offer is received outside the Bid Opening Room, the receiver will immediately hand deliver the offer to the Bid Opening Officer.

The Bid Opening Officer will return ALL DIBBS offers (whether received in or outside the Bid Opening Room) to the contractor. The offer will be returned as an attachment to the letter of rejection. This letter advises that it is unfair and improper to consider the offer since it would have a potential competitive advantage over other offerors, e.g., there could be more time in which to prepare the offer. FAR 14.301(e)/FAR 15.402(k) stipulate that the solicitation must specify which electronic commerce method is permitted.

L17C01 52.217-9002 CONDITIONS FOR EVALUATION AND  
ACCEPTANCE OF OFFERS FOR PART NUMBERED ITEMS (JUL 2002)  
DLAD

(a) The product described in the acquisition identification description (AID) of this solicitation is that product which the Government has determined to be acceptable. All Offerors shall indicate below, or through an alternative means in an electronic quoting system, whether they are offering an 'exact product,' an 'alternate product' (which includes a 'previously reverse-engineered product'), a 'superceding part number,' or a 'previously-approved product,' and shall furnish the data required for whichever is applicable. (To determine which type of product to indicate, Offerors must refer to the criteria in subparagraphs (b)-(e) of this provision, respectively.) Any product offered must be either a product cited in the AID; or be physically, mechanically, electrically, and functionally interchangeable with a product cited in the AID, including additional requirements referred to in the AID, if any.

Exact Product - Applies to CLIN(s):

(Vendor Fill-in)

Alternate/Previously Reverse-Engineered Product - Applies to CLIN(s):

(Vendor Fill-in)

Superceding Part Number - Applies to CLIN(s):

(Vendor Fill-in)

Previously-Approved Product - Applies to CLIN(s):

(Vendor Fill-in)

(b) 'Exact product.'

(1) 'Exact product' means a product described by the name of an approved source and its corresponding part number, as currently cited in the AID; modified (if necessary) to conform to any additional requirements set forth in the AID; and manufactured by, or under the direction of, that approved source. If an Offeror indicates that an 'exact product' is being offered, the Offeror must meet one of the descriptions in subparagraphs (i)-(iv) below. (Any Offeror not meeting one of these descriptions is not considered to be offering 'exact product,' even though the item may be manufactured in accordance with the drawings and/or specifications of an approved source currently cited in the AID.)

(i) An approved source currently cited in the AID offering its corresponding part number as cited in the AID;

(ii) A dealer/distributor offering the product of an approved source that meets the description in subparagraph (i) above;

(iii) A manufacturer who (A) produces the offered item under the direction of an approved source currently cited in the AID; and (B) has authorization from that approved source to manufacture the item, identify it as that approved source's name and part number, and sell the item directly to the Government. If requested by the Contracting Officer, the Offeror/Contractor must provide documentation to demonstrate such authorization.

(iv) A dealer/distributor offering the product of a manufacturer that meets the description in subparagraph (iii)

above. If requested by the Contracting Officer, the Offeror/Contractor must provide documentation that demonstrates such authorization.

(2) When the AID identifies the item being acquired as a critical safety item (CSI), offers of exact product will be evaluated in accordance with 52.211-9005.

(c) 'Alternate product.'

(1) The Offeror must indicate that an 'alternate product' is being offered if the Offeror is any one of the following:

(i) An Offeror who (A) manufactures the item for an approved source currently cited in the AID; and (B) does not have authorization from that approved source to manufacture the item, identify it as the approved source part number, and sell the item directly to the Government;

(ii) A dealer/distributor offering the product of a manufacturer that meets the description in subparagraph (i) above;

(iii) An Offeror of a previously reverse-engineered product that is not currently cited in the AID; or

(iv) Any other Offeror who does not meet the criteria in subparagraphs (b)(1), (d), or (e) of this provision.

(2) If an alternate product is offered, the Offeror shall furnish with its offer legible copies of all drawings, specifications, or other data necessary to clearly describe the characteristics and features of the alternate product being offered. Data submitted shall cover design, materials, performance, function, interchangeability, inspection and/or testing criteria, and other characteristics of the offered product. If the offered product is to be manufactured in accordance with data the Offeror has obtained from elsewhere within the Government, the Offeror shall either furnish the detailed data specified in this paragraph, or supply a description of the data package in its possession; i.e., basic data document and revision, the date the data was obtained and from whom (Government agency/activity). If the Offeror does not furnish the detailed data with its offer, the Contracting Officer will be unable to begin evaluation of the offered product until such time as the detailed data can be obtained from the Government agency/activity possessing the data. If the alternate product is a previously reverse-engineered product, the Offeror shall provide: traceability documentation to establish that the offered item represents the item specified in the AID (i.e., invoice from an approved source or submission of samples having markings of an approved source); number of samples that were examined; the process/logic used; raw data (measurements, lab reports, test results) used to prepare drawings or specifications for the offered item; any additional evidence that indicates the reverse-engineered item will function properly in the end item; and any evidence that life cycle/reliability considerations have been analyzed.

(3) In addition, the Offeror may be required to furnish data describing the 'exact product' cited in the AID. The data required from the Offeror depends on the level of technical data describing the exact product, if any, available to the Government. The possible levels of technical data the Government may have and the corresponding data submission requirements for Offerors are identified in subparagraphs (a)-(d) below. For the item(s) being acquired under this solicitation, the level of data in the Government's possession and the corresponding requirements for data submission are identified in the AID; or, if not specified in the AID, are as follows: C [buyer insert (a), (b), (c), or (d), as applicable, if AID does not identify]. (If the level of data in the Government's possession and Offeror requirements for data submission are not identified in either the AID or in this subparagraph (c)(3), then subparagraph (a) below applies.)

(a) No data: This Agency has no data available for evaluating the acceptability of alternate products offered. In addition to the data required in subparagraph (c)(2) of this provision, the Offeror must furnish drawings and other data covering the design, materials, etc., of the exact product cited in the AID, sufficient to establish that the Offeror's product is equal to the product cited in the AID.

(b) Adequate proprietary (i.e., limited rights) data: This Agency possesses adequate drawings and/or specifications for the exact product as cited in the AID, but such data are proprietary (i.e., limited rights) and shall be used only for evaluation purposes. The Offeror must furnish the data required in subparagraph (c)(2) of this provision, but is not required to submit data on the exact product.

(c) Inadequate data: This Agency does not have adequate data available for evaluating the acceptability of alternate products offered. In addition to the data required in subparagraph (c)(2) of this provision, the Offeror must furnish drawings and other data covering the design, materials, etc., of the exact product cited in the AID, sufficient to establish that the Offeror's product is equal to the product cited in the AID.

(d) Adequate catalog data: This is a commercial off the shelf item. Adequate catalog data are available at the contracting office to evaluate alternate offers. In addition to the data required in subparagraph (c) (2) of this provision, the Offeror must furnish with its offer a commercially-acceptable cross reference list; or legible copies of all drawings, specifications or other data necessary to clearly describe the characteristics and features of the alternate product being offered, sufficient to establish that the Offeror's product is equal to the product cited in the AID. The Offeror is not required to submit data on the exact product.

(3) Except for indefinite delivery purchase orders (IDPOs), if this solicitation is automated (i.e., if the solicitation number begins with SPE; or begins with SP0 and contains 'T' or 'U' in the ninth position of the procurement instrument identification number (PIIN)), the Contracting Officer will not evaluate offers of alternate product (which includes offers of previously reverse-engineered product) for the current procurement. Instead, the Offeror shall submit a request to the location below for evaluation of the alternate product's technical acceptability for future procurements of the same item. The request for evaluation shall cite the National Stock Number (NSN) of the exact product and, as identified in this provision, include the applicable level of technical data on the alternate and exact products. All offers of alternate product will be handled in accordance with DLAD 17.7501(b) (4).

(d) 'Superceding part number.'

(1) The Offeror must indicate that a 'superceding part number' is being offered if the offered item otherwise qualifies as an 'exact product,' except that the part number cited in the AID has been superceded. The Offeror may be requested to furnish data, or provide confirmation through some other means, sufficient to establish that there are no changes in the configuration of the part. However, if such data are unavailable, the Offeror may be required to furnish technical data as required in paragraph (c) for 'alternate products.' (If such data indicate there have been changes in the configuration of the part, the offered item must be identified as an 'alternate product.')

(2) For solicitation numbers beginning with SPE, any data to be furnished with an offer of a 'superceding part number' should be mailed to the buyer at the procuring activity address on the solicitation. (Uploading the information with the quotation, or including it in the 'Remarks' section, will make the offer a 'bid with exception,' causing it not to be evaluated.)

(e) 'Previously-approved product.'

(1) If the product offered has previously been furnished to the Government or otherwise previously evaluated and approved, the Offeror shall indicate in the space provided below, or through an alternative means in an electronic quoting system, the contract and/or solicitation number under which the product was furnished or approved.

CLIN NR(s)

(Vendor Fill-in)

have been previously furnished or evaluated and approved under contract/solicitation number \_\_\_\_\_.

(Vendor Fill-in)

(2) If the product was furnished or evaluated and approved by a contracting activity different from the one issuing this solicitation, Offerors are advised that the Contracting Officer may not have access to records of another activity or other information sufficient to reasonably determine the

offered product's acceptability. Therefore, in order to ensure that adequate data is available for evaluation, Offerors may elect to furnish with their offer the information requested by subparagraph (b) or (c) of this provision, whichever is applicable for the offered product. Offerors are advised that if the additional data is not furnished, the Government may not be able to evaluate the offer. (For solicitation numbers beginning with SPE, the information should be mailed to the buyer at the procuring activity address on the solicitation. Uploading the information with the quotation, or including it in the 'Remarks' section, will make the offer a 'bid with exception,' causing it not to be evaluated.)

(f) For all types of offers ('exact product,' 'alternate product,' 'superceding part number,' or 'previously-approved product'), Offerors shall provide the Contractor and Government Entity (CAGE) Code of the manufacturer and the part number being offered for each item in the solicitation.

(g) Failure to furnish adequate data and/or information as prescribed in subparagraph (b), (c), (d) or (e) of this provision (when required for the current procurement) within 10 business days or less, or as otherwise required by the Contracting Officer or elsewhere in this solicitation, may preclude consideration of the offer. For automated procurements, it is the responsibility of the Offeror when offering a 'superceding part number' or a 'previously-approved part number' to ensure that supporting documentation arrives at the contracting activity within 2 business days after the data is requested, or the offer may not be considered. The Agency will make every effort to determine, prior to award, the acceptability of the products offered which meet the dollar savings threshold shown below, and/or which have a reasonable chance to receive an award based on price offered. Generally, the Agency will not evaluate alternate offers not meeting the dollar threshold. The savings potential is based on the cost of evaluation (\$200.00 if only a local technical evaluation is involved, plus an additional \$1,200.00 for each required Engineering Support Activity evaluation). If the Agency determines that an evaluation cannot be completed before the expected contract award date due to urgent requirements for the item, alternate offers will not be considered for the current procurement. Instead, they will be evaluated for technical acceptability for future procurements of the same item, if adequate data is submitted and savings potentials are expected, as stipulated above. For alternate offers not evaluated, the Offeror's complete technical data package will be returned.

(h) If Offerors desire to restrict the Government's use of data submitted for evaluation, the data must bear the appropriate legends as prescribed by FAR 52.215 1(e). In the event an award is made to an Offeror submitting data without the appropriate legend, the Government will have unlimited rights to its use as defined in DFARS 252.227 7013.

(i) It is the Government that determines if the documentation or other evidence furnished by an Offeror is adequate to satisfy the requirements in this provision. If the Contracting Officer requests evidence from a Contractor who received an award resulting from this solicitation, and the Contracting Officer subsequently finds the evidence to be unacceptable, the award may be cancelled.

<b>L17D04 52.217-9C26 SURGE AND SUSTAINMENT (S&amp;S) EVALUATION FACTOR (JUL 2001) DSCC</b>  Instructions to offerors:  Describe the capability to initially ramp up (i.e., surge) and to sustain an increased pace of supplies to meet the surge requirements identified in Section B of this solicitation. The initial plan is merely a part of your proposal.  Address the following subfactors:  1) Explain the methodology for enabling visibility of supplier base resources as it relates to the S&S requirements on a continuing basis. Include any on-line access to suppliers' inventory and production information systems.  2) Identify the supplier base inventories, production capability, or any other means of S&S support that are available to meet S&S requirements. Based on this identification, describe your strategies for meeting the S&S requirements in the solicitation, and explain how these strategies will be applied to the S&S items in this solicitation.  3) Describe any agreements with suppliers that reflect access to the supplier base resources, including any commitments to hold rotating amounts of assets, time frames for delivering these assets; any commitments to provide access to production capabilities, and time frames for this access.  4) Describe any access to and plans for coordinating distribution (receiving, storing, packaging, and issuing) and transportation services needed to meet S&S requirements. Include any agreements with suppliers of these services, and the time frame for the services to be provided.  5) Identify the S&S items under this solicitation that may be difficult to provide for quick initial ramp-up and elevated demand levels for sustainment. State the reasons for the difficulties and describe a proposed solution (for example, obtaining and storing raw materials or component parts, obtaining production tooling needed to expand production) for overcoming the difficulties, etc.).  6) Clearly identify any significant investments (dollars) needed to develop S&S capability. The total cost of the investment shall be identified in CLIN 6002. For those S&S investments, explain why the investment is needed, what you propose purchasing, the basis for the investment cost, and the S&S capability to be gained. For investments proposed to effect S&S strategies, include an analysis of what S&S strategies were considered, and why the proposed strategies are the most cost-effective.  7) For items the contractor knows are readily available and accessible in sufficient quantities to meet the S&S requirements, a contractor-signed statement may be used in lieu of obtaining more extensive S&S assessment information. This statement shall contain the contractor's rationale for concluding that an S&S item is readily available, identification of the method of access to those items, identification of the delivery terms and the projected lead-times for the S&S items. The statement shall also be accompanied by a description of access to and plans for, coordinating distribution and transportation services for meeting S&S requirements.		<b>L33C01 52.233-9000 AGENCY PROTESTS (SEP 1999) DLAD</b>  <b>L45D01 52.245-9C03 GOVERNMENT PRODUCTION AND RESEARCH PROPERTY (APR 1985) DSCC</b>  <b>L52A01 52.252-1 SOLICITATION PROVISIONS INCORPORATED BY REFERENCE (FEB 1998) FAR</b>  This solicitation incorporates one or more solicitation provisions by reference, with the same force and effect as if they were given in full text. Upon request, the Contracting Officer will make their full text available. The offeror is cautioned that the listed provisions may include blocks that must be completed by the offeror and submitted with its quotation or offer. **M15D02 52.215-9C09 EVALUATION FACTORS FOR AWARD (OCT 2002) DSCC**

(a) General Basis for Award: Award will be made to the offeror or offerors whose offer(s) conform to the solicitation

requirements and represents the best value to the Government. Unless either clause 52.216-9C38 or 52.216-9C08 are included, at time of solicitation the Government anticipates making a single award. The following evaluation factors will be considered in the evaluation of proposals received under this solicitation with their assigned ranking in descending order of importance:

- 1 - Price
- 2 - Past Performance
- 3 - Proposed Delivery
- 4 - Surge and Sustainment (See Provision 52.217-9C24)
- Other:

All factors other than price listed above are, when combined, approximately equal to price.

**M15D04 52.215-9C19 WEIGHTED AVERAGE PRICE EVALUATION METHOD (SEP 2000) DSCC**

\*\*\*\*

By use of the following weights a weighted average price will be developed for each item using the formula stated in subparagraphs (1) through (3) below.

INCREMENT WEIGHT

A	1
B	2
C	1
D	1
E	1
F	

(1) The weighted average price (for a given item for a given year) will be arrived at as follows:

(Offered unit price) x (increment weight) = weighted unit price

(sum of weighted unit prices) divided by (the sum of the weights) = weighted average price.

(2) (The weighted average price) x (the estimated annual requirement) = estimated annual cost for a given item for a given year.

(3) The sum of the estimated annual costs for a given item for

the base year plus any option periods = the total estimated cost for that item.

Evaluation for Award:

The Government will evaluate the proposed S&S capability assessment based upon the contractor's ability to meet the stated S&S requirements and the thoroughness of the solutions provided to rectify any identified shortfalls (if applicable). Surge CLIN price(s) will be evaluated for reasonableness but will not be included in the overall comparative price evaluation.

The highest rating will be given those offerors who are able to demonstrate that they can meet the following criteria in response to those factors and subfactors described under

Instructions to Offerors.

1) On-line access within short time frames and use of automated tools for analysis is preferred for enabling visibility of supplier base resources as it relates to the S&S requirements on a continuing basis, over less automated methodologies.

2) Detailed information on the identification of the supplier base inventories, production capability, or any other means of S&S support that are available to meet S&S requirements for each NSN or item grouping is preferred over general information.

3) Well-defined agreements with suppliers that reflect access to the supplier base resources, including any commitments to hold rotating amounts of assets, time frames for delivering these assets; are preferred over incomplete less defined agreements or plans to make these agreements.

4) Well-defined agreements and coordination plans for coordinating distribution (receiving, storing, packaging, and issuing) and transportation services needed to meet S&S requirements are preferred over incomplete coverage, and less defined agreements and coordination plans.

5) Comprehensive identification, sound rationale and cost-effective solutions for the S&S items under the solicitation that may be difficult to provide for quick initial ramp-up and elevated demand levels for sustainment difficulties, is preferred over less detailed information.
